WORK EXPERIENCE

Whitehart	**Aug. 2020 – Present**
Website and System Developer	*Remote, SA*

- Responsible for creating new systems, and managing older systems, as a full stack developer. Currently developing with Laravel as a back-end solution, and Vue or React as a front-end solution, with Tailwind as the CSS framework. I maintain older systems runs on PHP 7 and CodeIgniter, HTML, CSS and Javascript/jQuery.
- Using cloud server solutions such as RunCloud. Usage of solutions such as Postman, Bitbucket, Google Suite, Jira / Clickup.
- Create APIs between a front-end Javascript framework (React or Vue) and a Backend PHP framework (Code Igniter or Laravel). Creating APIs between other software / systems and our own. Large examples are TPN Credit Checks and MRI Property Software
- Development of custom shortcodes/plugins, usage of Elementor, and child theme editing for Wordpress.
- Working entirely remotely.

E-Com South Africa	**Feb. 2018 – Aug. 2020**
